the beans, after thorough cleaning, are carefully roasted to bring out the full, rich flavor of the finest cocoa beans. The process demands rare skill and experience.

Service phone you how Cocon ought to taste

Partly because

-cocoa beans from various tropical sections are combined and ground into an exquisite blend.

Seconey's phone you how cocon ough to tast

Partly because

-after excess cocoa butter is removed, the cocoa powder is reground and sifted through silk. This insures a fine powder that gives up its rich flavor more quickly than would be possible with a coarser powder.

# Surreys phones you how Cocon ought to tast

-it is impossible to get fine flavored beans than you will find in Lowney's. Because it is impos-sible to blend, roast and grind these beans with more experienced skill or greater care than we use at our factory in Montreal.

Lowney's Cocoa gives you the very best flavor that the finest cocoa beans can yield. It simply shows you how cocoa ought to taste.

# Woman's Rights

It is your inalienable right to demand in a range omy, Promptness and Satisfaction. It is your privilege to expect the same attention, progress and efficiency in the things you use in your daily work as have been brought about in other and often less important lines of endeavour.

The Gurney-Oxford is the foremost example of cooking efficiency.

The Gurney Economizer regulates all the drafts by lifting or dropping one small lever. It keeps the fire alive for hours with practically no coal consumption. It saves 1 ton of coal in 6. The Gurney Economizer is found only on the Gurney-Oxford range.

The Gurney-Oxford Oven is absolutely and always heated the same on all sides and in all corners because the heat is evenly distributed.

This is a sure and unfailing guarantee that whatever comes out of the Gurney-Oxford Oven is crisp and light and delicious—this is the final test and the point most often advanced by those who cook on a Gurney-Oxford, those who believe it is woman's right and privilege to have in her kitchen the labor, time and money saving principles embodied in the Gurney-Oxford.

Dear Edith,

In a general way I have wished you all the good things I know of, so now I am going to descend to the practical and give you some sound advice from the store I have accumulated since I started housekeeping.

Housekeeping naturally suggests the kitchen first—its equipment and management, or in other words, THE RANGE

My range, as you know, is a Gurney-Oxford. I never enjoyed much of a reputation as a cook in my younger days, so when I thought of being responsible for three meals a day my heart sank. I imagined myself battling all day with a sulky range, trying to coax it into a good humour, and covered with mortification because of late or spoiled meals. But my dear, my Gurney-Oxford seemed to sympathize with my inexperience. From the day it came it

It has the cleverest arrangement for regulating drafts, well named the Gurney Economizer. One small lever put up or down does everything. The fire will stay in all day, hardly burning any coal at all-then, presto! It is burning brightly, ready to bake or roast. An arrangement of flues keeps the oven always properly heated, so that the biscuits or bread come out light and crisp and brown. Yes, Edith, as Bob says, I have developed into "some cook," and I often tell him he must give at least half

the credit to our Gurney-Oxford. You will understand my enthusiasm better after you have had your Gurney-Oxford a month or so. Sincerely Yours,

MARY HOUSEWIFE.

A FREIGHT ELEVATOR not only saves dollars every day for the store that employs it, but it adds a real dollar-andcents value to that store's appearance.

It ensures quick, clean handling of goods whether they are being sent out or received. It means conveying those goods to their proper destination immediately and storing them until needed, where they will require the least amount of handling.

# A Beautiful Range---Yet Easily Kept Clean

Glance at the "PANDORA" as it stands complete-a handsome range surely, yet easily kept clean. McClary's famed "Duplex" nickelling cannot burn off-it never becomes tarnished. About it there is no superfine "impossible-to-keep-clean" tracery-the nickel adornment is rich-the carving bold.

"PANDORA" surfaces are "burnished." The McClary system of burnishing is a special process that produces surfaces as smooth as plate "PANDORA" surfaces keep glass. their color indefinitely-they retain our special water-proof dressing. So, you can keep the "PANDORA" bright and clean by simply rubbing a dry cloth over it.

The "PANDORA" is more than a handsome range. It is also a permanent investment hecause it is built to endure—it is the one range that is as strong and compact, as it looks.

The "PANDORA" cooking surface is made in sections with expansion top the covers and cross-bars fit into them—this allows for expansion and contraction without any possibility of cracking or warping.

"PANDORA" Range

Top sections are reversible—you can place a boiler cross-wise on the "PANDORA" if you wish to use front pot-hole over fire. "PANDORA" lids and entire top are extra heavy and guaranteed not to crack or break under ordinary usage. N. B .- You can have the story of "PANDORA" Efficiency in detail by simply asking

Every housewife wants to know that she can depend on her stove absolutely; she wants to know that there is no element of chance or likelihood of mishap in her cooking arrangements; that meals will be ready promptly on time.

The Gurney Economizer is an assurance against accident and mishap in cocking. It is a simple device and found only on the Gurney Oxford. One lever controls everything. The fire can be slowed down for hours and revived in a few minutes. An arrangement of fluce makes the Gurney-Oxford Oven always uniformly heated—the Gurney-Oxford Oven is never to blame! It will make a good cook a better cook; it does more than its share towards making every meal a success and a pleasure.

# This Way, Please

At the opening of each season comes the "Man who Doubts."

He "don't believe" He can get a ready-to-wear Suit or Overcoat that will fit him; He wear suit or overcoat that will nt nim; He
"don't delieve" that we can save him, money on
clothing; He "don't believe" our advertisments;
He "don't believe" anything or anybody—and
yet the chances are ten (to one that when He comes here he'll buy one of our Suits or Oyercoats or perhaps both !

Why? Because there is proof in 'our stock to convince the most confirmed unbeliever.

There's style here. There's beauty. There's artistic tailoring. There's proper finishing. There's good materials. There's a guarantee. And, best of all, the prices are there, proving themselves, in every case, below the figures of most stores.

We want the man who doubts to come in to see some of our splendid garments. It costs nothing to see them !

That incident at Edmonton in connection with the violt of Ilis Rigal Highness the Duke of Commaght, looks annet worse since George S. Amatrong, mayor of Edmonton, made public over his own signature the circumstances under which the address to Ilis Reyal Illycenes was prepared. In that address there was a statement, direct or implied, that the people of Edmonton forword the revignosity perfected the opinion of all the people of Edmonton; it has exemplely reflected the opinion of all the people of Edmonton; it has exemplely place in a civic address to the Governor-General Properties of the people of Edmonton of the people when as in evident from the fact that the live incident stands above that as in evident from the fact that the live incident stands above.

We have hundreds of orders at each of our branches to be shipped to stores this month. There will be hundreds more arriving every week. This shows how Oxo Cubes are appreciated.

# SUBES good thing

Oxo Cubes are a triumph of the twentieth century science and skill. They admit of many delightful possibilities in cooking. For soups—stews—hashes—gravies—sauces and similar dishes OXO CUBES are splendid. Marvels of convenience, OXO CUBES are time-savers—trouble-savers—money-savers. Al-ways the same—uniformly good in strength, quality and flavor.

RAILROAD TRANSPORTATION

Solid vestibuled trains, the last word in railway comfort to the everyday traveler, play a large and important part in the popularity of a railway.

THE CANADIAN NORTHERN ONTARIO RAILWAY operates solid vestibuled trains exclusively. It has no old pastenger coaches. Its dining carbervice has set a new standard, its parior cars are everything that the word implies.

When next you contemplate a railway journey, get a CANADIAN NORTHERN ONTARIO RAILWAY FOLDER and study its convenient schedules.

Your station agent, L. W. Buller, or your up-town agent, J. A. Burke, will spooly you with tickets and all information.

# This Way, Please

At the opening of cach season comes the "Man who Doubts

He "don't believe" He can get a ready-to-wear Suit or Overcoat that will fit him; He "don't delieve" that we can save him money on clothing; He "don't believe" our advertisments; He "don't believe" anything or anybody-and yet the chances are ten to one that when He omes here he'll buy one of our Suits or Overcoats or perhaps both !

Why? Because there is proof in 'our stock to convince the most confirmed unbeliever.

There's style here. There's beauty. There's artistic tailoring. There's proper finishing. There's good materials. There's a guarantee. And, best of all, the prices are there, proving themselves, in every case, below the figures of most stores.

We want the man who doubts to come in to see some of our splendid garments. It costs nothing to see them !

"Your cooking is improving."

"Well perhaps it is, and I hope so, but really, Mrs. Housewife, I think our new Gurney-Oxford is partly responsible for the success I have had lately. I was never able to cook roasts and fowl so well on our old stove, and as for bread and biscuits, I used to tremble when I went to take them from the oven-they were so often soggy and heavy. Now they are always light and beautifully brown, and, if I do say it myself, something to be proud of."

"That's true, Mary, my husband has said almost the same thing. I'm awfully glad you approve of my choice of a Gurney-Oxford. He approves because of the saving in coal since we got it, also because of the better meals he is getting."

# What Honesty Means in Cocoa-Making

In cocoa-making, honesty may have two meanings. A manufacturer may set out to produce a medium grade cocoa. He may honestly adhere to that standard. But the standard is low. The-cocoa flavor suffers.

0

A manufacturer may set out to produce cocoa of the very finest quality possible.

He then puts himself under constant extra expense.
The finest cocce beans must be used. They cost much more than medium grade beans.

He must employ skilled, and therefore expectory foremen.

He must install expensive modern machin He must use care, care, care, and expensive time rem the start to the finish of his cocos-making.

In Lowney's we set out to make the very finest cocca that could be produced. The equipment of our factory at Montreal shows the pains we take.

To justify our extra expense we must make for Lowney's Cocca firm friends—cocca lovers who will not be satisfied with cocca of a lower quality.

This we are accomplishing. I And the result of an honest adherence to this high-standard policy you can enjoy in a wholesome cup of Lowney's Cocca. Sold by grocers. In tins-10c to 50c sizes.

Mix two even tablespoonfule of occos with two of sugar. Add 36 abbospoonful salt. Mix gradually with two cups of boiling water. Stir to a smooth poste. But 5 minutes. Add two cups of scalded (not boiled) milk, and best with an agg-beater

### GRAIN COMMISSION BRINGS BIG REFORMS

Since the appointment of the Grain Commission by the gover Since the appointment of the Grain Commission by the poterment important changes in the landing of the west's grain have been effect asl which promise to vernely many of the long-standing grievances of 'Ashimana, W. D. Shaples and Frank N. Gibbs, has been making a seri-ous study of the whole grain problem. It has made a tour of the west from Fort William to Varseuver and has studied at first. Insat the 'many intricate questions which arise in the transportation of, grain. Reform locking to the protection of both the problemer and consumer

are now being effected.

In the first place an enormous public owned elevator is being built are many pares an enormous puone connet cevador it being built at Teot William, where farmer can ship their grin and can be certain that there is none of the degrading by mixing which has been so often complained of in the past. The elevator will be one of the largest at the head of the lakes and will be's model elevator in every respect. The contract has already been let and work is being rushed as rapidly as possible.

Western farmers will welcome the news that a public laboratory o be established at Winnipeg for the purpose of testing samples of is to be established at Winnipeg for the purpose of to grain sent in by farmers.

grain sent in by tarmers.

Reports as to the milling qualities of the grain, the digree of incisture it contains, if any, and its commercial value when less than standard grade will be made to the farmers free of charge. In this way farmers can ascertain with absolute accuracy the commercial value of farmers can ascertain with also their wet or damaged grain.

Furthermore, four travelling inspectors have been appointed by the government through the grain examination whose duty it will be to examine and deal with all questions of car distribution, weights, grain shrinkage in transit, etc. Full authority will be vested in these

It has been decided to take the weighing of grain at Fort William out of the jurisdiction of the Department of Inland Revenue and place it in that of trade and commerce.

A sample market, which is one the reforms which has long demanded by the grain growers of the West, will be established a Winnipeg. Arrangements have been completed with the Winnipe Grain Exchange to double the capacity of their building in order to provide room for the market. Another narket will be located at Calgary and probably a third at Moose Jaw.

# Are You Comfortable?

If so we would only ask a few moments of your time to explain one of the ways we can help make the winter evenings more enjoyable.

A man said that electric light hurt his eyes. We have taken the trouble to get, advice from illuminating experts and they advise that there are no hurtful elements in electric light.

To get real eye comfort, place the light out of the line of the eye and use frosted lamps: We will later give you a short talk on the different uses in the home.

### Children Under, 13 Should Drink Lowney's

Why? As children begin to grow up, they often tire of milk and water and want to drink what Papa and Mamma drink—including tea and coffee.

The best dietetic authorities in England and elsewhere say that children under 13 should neper touch tea or coffee. But after seven years of age, cocoa is recommended.

Lowney's is made from the finest cocoa beans the tropics produce. Our Montreal factory is a model of neatness and up-to-dateness.

Lowney's Cocoa is thoroughly wholesome, with a delicious flavor that quickly appeals to both children and their parents. Sold by grocers. In tins—10c to 50c sizes.

## Are You Comfortable?

If so we would only ask a few moments of your time to explain one of the ways we can help make the winter evenings more enjoyable.

A man said that electric light hurt his even. We have taken the trouble to get, advice from illuminating experts and they advice, that there are no huriful elements in electric light.

To get real eye comfort, place the light out of the line of the eye and use frosted lamps.

We will later give you a short talk on the different uses in the home.

### CANADA'S FINANCES SPELL PROSPERITY

The half-yearly financial statement for the Dominion which ha been issued shows that Canada's finances were never so prosperous as under the guiding hand of Hon. W. T. White. A careful and progress-ive policy is being followed. A striking feature of the statement is the the goody is desig monotoned. A straining scatter of the statement is the decrease in Canada's dobt by ten million oldalms as compared with a year ago. The revenues for the six months from March 31 to Sept. 90, amounted to S84,376,000. This is an increase of \$817,300,126 over the same period in 1911. The increase is at the rate of 27 per read-tive expected that the revenue for the year will read-of-decade-ic expected that the revenue for the year will read-of-decadeing total of \$170,000,000 if the present rate of increase is maintained. The revenues for the half year and the half year of 1911 wer le up as follows:—

	1912	1911
Customs	856,455,146	\$12,234,535
Excise	10,152,014	8,799,585
Post Office	4,850,000	4,7150,600
Public Works, Railways	6,720,578	5.873.687
Miscellaneous	3 200 011	2 201 816

The expenditure upon consolidated fund for the six months wa \$45,031,539 as against \$35,033,456 in 1911. The expenditure on capita consistance as against 855,085,666 in 1941. The expenditure on capital account shows a reduction of some nine hundred thousand. The ex-penditure was \$11,671,83 as against \$12,318,027 in 1941. The most networthy decrease is in the Transcontinental. Although the work is being rashed by the Government, the expenditure was nearly three millions lose (fact, 1941).

being rushed by the contenues.

The net debt as compared with a year ago was reduced nearly ten million and a half dollars and row stands at \$313,508,376 as against \$323,938,768 the same time a year ago.

During September the revenue was nearly fourteen and a half millions, the exact figures being \$84,475,485. In September, 1911, it was \$12,032,008. The increase thus was nearly 20 per cent. Customs stood at \$20,032,008. The increase thus was nearly 20 per cent. Customs stood at \$20,036,352 excèse at \$1,778,4111; post-offices at \$1,050,000; public works and milways at \$1,001,583; and miscellaneous at \$739,public works and raiways at \$1,001,580; flat miscenaneous a sense; 128. The corresponding figures last year were—Customs, \$7,063,095; excise, \$1,691,295; post-offices, \$000,600; public works, \$1,116,853; and miscellameous, \$221,033. There thus is a drop of about \$112,000 in receipts from public works and railways.

During the past ammort, the fruit impection service of the Dept. of Agriculture widentily extended and was compilerly recognized by Hon. Martin Burell. The result has been-geen this fall in the most efficient fruit inspection Canada has ever had. At the last Dominion Pruit Growers' conferences great stress was hall on the importance of proper grading and marketing of fruit and the need for more extended impection, epochaging at points of shipment and of fruit coming in adaptation, and the stress of the proper grading and marketing of fruit and the need for fruit content of the stress of the stress

staff.

In the past Canadian export fruit has been closely inspected, with the result that Dominion fruit stands high in the markets of Grest Bartian and Europe. Despite continual requests for better domestic inspection, Hon. Sydney Fisher neglected inspection. Hon sydney Fisher neglected to improve the arrangement for inspection for domestic communition. # Why Bread is Better Baked in Some Ranges Than in Others

It is all a matter of the way the heat gets into the oven. Some stoves have ovens that heat easily and quickly and remain

very hor.

Others have ovens that require a wasteful amount of fire in the fire-box before baking heat is reached.

These are the two extrements. For some things each type has advantages.

But for all your requirements neither is really

These are cocoa beans They look much alike

But they are quite different in cost and in flavor. The cocoa beans that meet the Lowney

standard are rare and expensive.

There is a large sale, however, for cocoa bea a much lower quality. They, too, are used to make cocoa.

I hey, too, are used to make cocoa. It is plain, therefore, that a large share of the cocoa on the market must be of a grade distinctly inferior to Lowney's, which is produced from the very finest cocoa beans.

Many a housekeeper has the wrong impression of cocoa flavor through using cocoa made from inferior beans. Some housekeepers may be satisfied with this ordinary cocoa, which really is not at all bad.

But cocca lovers who wish the finest possible cocca flavor owe it to themselves to try Lowney's. Cocca, at its best, is a perfectly delicious and a thoroughly wholeswee beverage. In Lowney's you simply get cocca at its very best—produced at a factory (in Montreal) which is a model of neatmess.

## Electric Light for the Dining Room

The lighting of the dining room should be centralized over the table having the light thrown on the table and shaded from the eyes. This will give the light where it is needed and yet give eye comfort. It will also give a cosy appearance.

Do not forget to arrange for a drop for the toaster or coffee percolater. If you do not use one now, you will be converted soon.

RAILROAD TRANSPORTATION

Solid vestibuled trains, the last word in railway comfort to the everyday traveler, play a large and important part in the popularity of a railway.

a railway.

THE CANADIAN' NORTHERN ONTARIO
RAILWAY operates solid vestibuled trains exclusively. It has no old passenger coaches. Its dining car
service has set a new standard, its parlor cars are everything that the word implies.

When next you contemplate a railway journey, get a CANADIAN NORTHERN ONTARIO RAILWAY FOLDER and study its convenient schedules. Your station agent, L. W. Buller, or your up-town agent, J. A. Burke, will supply you with tickets and all information.

drink Lowney's at breakfast?

The unit of food value is called a "calorie."

One egg contains 93 calories. Two teaspoonfuls of Lowney's Cocoa (making 2 cups) contain 118 calories.

When you drink Lowney's Cocoa in the morning you add to your supply of energy for the day's work.

In addition to its wholesomeness, you will find that Lowney's makes the most palateable of drinks.

It is made from the costliest cocoa beans grown in the tropics, skillfully roasted and blended. Our Montreal factory is a model for cocoa making.

## Important Announcement

A serious typographical error occured on several of the Advertisements of Lowney's Cocoa which have appeared in this newspaper. The recipe showing how cocoa should be made called for "I-8 table-spoonful of salt". It should have called for "1-8 teaspoonful of salt". The correct recipe, as it will appear in all future advertisements of Lowney's Cocoa, is as follows:

### The Correct Way to Make Cocoa

Mix two even tablespoonfuls of cocoa with two of sugar. Add 1-8 teaspoonful of salt. Mix gradually with two cups of boiling water. Stir to a smooth paste. BOIL 5 minutes. Add two cups of scalded (not boiled) milk, and beat with an egg beater until frothy.
